

SARASOTA CELEBRATES NEW GARAGE IN HISTORIC ST. ARMANDS

In 2017, the City of Sarasota partnered with Kimley-Horn to lead the design of **St. Armands' first parking garage**. Kimley-Horn's design efforts included prime design, site planning, community outreach, civil engineering, landscape architecture, traffic engineering, parking consultation, and structural engineering services. The design team also included key consultants for architecture and MEP engineering.

The four-level garage and adjacent surface lot provide nearly 500 parking spaces, including five electric vehicle charging stations, a tire inflation station, a bicycle storage and repair station, and public restrooms. Key design features include exterior cascading stairs, an interior lightwell, enhanced landscaping, and a beautiful metal mesh twisted façade.

The garage was constructed by the Jon F. Swift/Haskell joint venture and was opened to the public in February 2019.

Additionally, we are currently assisting the City of Sarasota in achieving Parksmart certification for the St. Armands Parking Garage.

Kimley-Horn is proud to be a part of a wonderful project for the City of Sarasota and the St. Armands community.
